

## Halo tubephones™

Quiet as ANR – Comfortable like nothing else™

Quiet Technologies is the pioneer of microweight earplug headphones introduced the first headband-style noise isolating foam-insert headband in 1992. The latest Halo design tames the loudest cabin noise, yet it is comfortable even for day-long flights. The low-frequency noise attenuation is proven equal or superior to more costly ANR systems, without the need for batteries and complicated electronics. The noise damping in the mid to upper speech frequencies is superior to nearly every lightweight ANR headset on the market. The result is the quietest and most comfortable headset you have ever tried.

The comfortable foam inserts may be removed with a simple pull so that dirty tips may be discarded. The foam inserts are also designed to allow comfortable ear canal pressure equalization when ascending or descending – something that plastic or custom molded rubber ear tips cannot do.

The advanced technology bidirectional noise-canceling electret microphone is perfect for aircraft communications even in the noisiest cabins.

The Halo may be worn in a variety of configurations: Over-the-head, behind-the-head, or on the shoulders. This unique arrangement allows the unlimited use of hats or glasses without the pressure, sweating or messing the hair.

## Specifications:

**Weight (wearable):** 0.8 Oz.

**Noise Reduction:** 30–45 dB SPL (100Hz–6000Hz)

**Microphone:** Noise-canceling electret type

**Wires:** Kevlar reinforced

**Insert Tips:** Push-mount Elastomeric slow expansion rate foam, or Triple-flange silicone rubber. (Replacements available)

**Speakers:** Nickel-metal alloy balanced armature.

Diaphragm: metal. **125 peak dB SPL output in 2c.c. coupler is possible.** (See see precautions in owners manual)

2 year manufacturers warranty

# Halo Tubephones™ INSERT HEADSETS FOR GENERAL AVIATION

ANR alternative.  
Quiet as most ANR headsets  
without the pressure or weight.

Available in  
**Piper Yellow** or  
**Jet Black**

Stereo high output  
speakers made  
from Nickel—alloy

Adjustable  
size headband

Critically-  
damped sound  
tubes for clear  
sound and  
noise isolation

Pressure-relieving,  
comfortable, noise  
control foam inserts

Three position headband  
(over-the-head, Behind-  
the-head, and over-the-  
shoulders)

Noise canceling  
microphone

Stereo Volume  
Control and  
Stereo/Mono  
Switch

Batteries NOT required!

(priced far below the competition)

*"Halo's an awesome blend of long-range comfort with ANR-like quiet." — Langley Spiers, MA.*

*"They take 10 more seconds to put on, but they are worth the effort" — Gearald Simms, GA.*

*"Halo has renewed my wife's flying interest. She can wear the headset behind her head, or even on her shoulders which makes a 'good hair day' everytime we fly."  
— Elliott Sanders, LA.*

*"I like the replaceable ear-tip feature. You can keep it sanitary" — Sam Polk, TX.*

*"Send me another set. My co-pilots are always begging me to let them use mine!"  
— Russ McCandless, MT*

*"I just bought a new set of superlight ANR headsets. They are good, but I would rather use the Halo on longer trips." — Marsha Simons, UT*

*"Man, are these things quiet and comfortable!!!" — (everyone who has tried it)*
